

Environmental Policy

Obligations

Moddex is committed to the protection of the environment. It is our policy to conduct all aspects of business in a manner which meets the requirements of an Environmental Management System based on AS/NZS/ISO 14001:2004. Management is committed to establishing measurable objectives and targets, and continuously improving Environmental performance.

Objectives

The company will:

- Ensure continual compliance with environmental laws, current industry standards and AS/NZS/ISO 14001:2004.
- Exceed where possible minimum standards of compliance
- Minimise the impact of our activities on the environment
- Provide information, instruction, training and supervision to employees, contractors and customers to ensure their safety
- Provide support and assistance to employees
- Ensure our survey & design procedures and projects are safe for our customers, public and the environment.

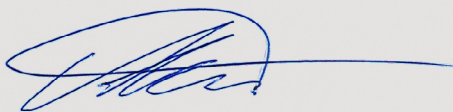

Responsibilities

In satisfying this commitment we will:

- Progressively establishment and maintain companywide environmental systems for our operations.
- Integrate environmental factors into planning and operation decisions.
- Assess the potential environmental effects of our activities and regularly monitor our environmental performance through internal and external auditing.
- Strive to continuously improve our environmental performance by using resources as efficiently as possible and by reducing the effects of our work activities on the environment.
- Rehabilitate the environment that is effected by our activities.
- Promote awareness of the environment within the organisation by training and encouraging a responsible attitude to the environment through the organisation.
- All employees will be made aware of the Environmental Management Program and are expected to comply with it within the workplace.

Application of the Policy

This policy is applicable to all Moddex operations. It is endorsed at the most senior level and displayed at all work locations. The Environmental Management Program will be developed, introduced and maintained by consultation between management and employees. All employees will be aware of the Environmental Management Program and to comply with it within the workplace.
