## Hot Design Tips

## For easy top & wall mounted handrail compliance on stairs

Top mounted Handrails such as AR10, AR45 or CB30 used on stairs, require a substrate width of 1150+mm to meet the minimum 1000mm clear between rails requirement of AS 1428 & NCC/BCA. Space permitting, a substrate design width of 1200mm+ to achieve compliance & allow for stanchions to be placed 75mm in from edge of concrete is ideal.

(See Section A)

Wall mounted Handrails such as AR150, used on stairs, require a substrate width of 1210+mm to meet the minimum 1000mm clear between rails requirement of AS 1428 & NCC/BCA.

(See Section B)

CeModdex Group. All Moddex products are supplied subject to the Moddex Terms and conditions of sale. Moddex recommends all products and/or systems are installed by an inducted installer or other competent person. Moddex is not liable for the selection & installation of the right product and/or system. Moddex accepts no liability for any products and systems incorrectly installed or certified. While Moddex can provide assistance, recommendations or guidance in relatio to product selection and installation. Moddex is not liable for any installed or accepts no liability for any products and systems incorrectly installed or certified. While Moddex can provide assistance, recommendations or guidance in relatio to product selection and installation. Moddex is not liable for any inscurrecy or misinterpretation whatsoever. Moddex cannot warrant structural integrity or suitability to which any product or system is attached to and must be assessed by a qualified design engineer. Failure of the customer to follow or adhere to applicable Australian Standards, Building Codes, WHS Acts & Regulations, Codes of Practice & Guidelines, site installation requirements may result in serious injury or death.
