

## **Hot Design Tips**

## Location of ramps to prevent protrusion of handrails at property boundaries

In accordance with AS1428.1-2009 Clause 10.3 (f), ramps that intersect at a property boundary need to be set back by a minimum of 900mm so that the handrail (compliant to Clause 12) and TGSI's do not protrude into the transverse path of travel.

As shown in the plan & section view below, the Moddex Assistrail AR20 has been designed in to show that it fits within the 900mm minimum.

Moddex Group. All Moddex products are supplied subject to the Moddex Terms and conditions of sale. Moddex recommends all products and/or systems are nstalled by an inducted installer or other competent person. Moddex is not liable for the selection & installation of the right product and/or system. Moddex accepts no liability for any products and systems incorrectly installed or certified. While Moddex can provide assistance, recommendations or guidance in relation to product selection and installation, Moddex is not liable for any inaccuracy or misinterpretation whatsoever. Moddex cannot warrant structural integrity or suitability to which any product or system is attached to and must be assessed by a qualified design engineer. Failure of the customer to follow or adhere to applicable Australian Standards, Building Codes, WHS Acts & Regulations, Codes of Practice & Guidelines, site installation requirements may result in serious njury or death.
