

Product Substitution Warning

Conectabal[®] - Comercial Balustrades

The Moddex[®] product range, Conectabal[®] - Commercial Balustrades, has several key attributes.

In the unlikely event that a substitution is proposed, please ensure that any comparison product meets or exceeds these essential attributes.

Designed and manufactured in accordance with:

- ✓ Building Codes (NCC & BCA)
- ✓ Australian Standard AS/NZS 1170:2002
- ✓ Australian Standard AS1428.1-2021
- ✓ Relevant statutory WHS Codes of Practice/ Guidelines
- ✓ 3rd Party Load Testing of product by a NATA certified lab
- ✓ Galvanized to AS 4792 and AS/ NZS 4680:2006 (where applicable).

Other attributes include:

- Ergonomic components removing risks such as finger entrapment and ensuring an aesthetic finish that compliments the project.
- Tamper-proof technology with DEXX[®] Locking Screw
- 50-year design life
- 5 years warranty from date of purchase
- Smooth handrail transitions with Mandrel pipe bends

Moddex[®] offers a design process for all projects. This process includes base modeling, compliance checks, client revision, approvals, production and installations drawings.

This process ensures that our product will always fit to your project, guaranteeing you stay compliant. To learn more about our design process, follow the QR code to watch a short video.

Moddex[®] products can be identified by branding present on the installed range. Any modular products without Moddex[®] branding cannot guarantee the same level of compliance and testing standards.
